

## Tyler Content Manager for Infinite Visions

*Standard Edition • Enterprise Edition*

Your time and office space are valuable. That's why you need innovative solutions to maximize your document storage and management needs. Whether you're ready to lessen the paper shuffle or eliminate paper storage altogether, Tyler Content Manager™ (TCM) is an industry-leading solution that helps bring your physical document storage system into the digital age. Now you can electronically capture, manage and retrieve all of your documents with TCM. Built with enough flexibility and options to meet any agency's needs, TCM handles all of your document management challenges with ease, precision and an eye on efficiency.

**Tyler Content Manager Standard Edition** (TCM SE) is integrated with the Infinite Visions® Enterprise Edition, as well as the iVisions® Employee Self Service and Online Workflow applications.

- **Capturing.** Infinite Visions captures and stores the content and underlying metadata associated with each record to make advanced searches possible. In addition, TCM's automatic document indexing feature recognizes standard forms and collects preselected data, while private information is kept private with automatic redaction.
- **Managing.** TCM's advanced features help you manage your documents with much less effort. Its integrated document retention schedules help you manage document inventory while meeting retention mandates. TCM also creates an audit history of images and document data.
- **Retrieving.** Thanks to its exceptional search capabilities, TCM SE gives you direct, broad-based access to all of your documentation rather than having to access documents one by one through Infinite Visions.

**Tyler Content Manager Enterprise Edition** (TCM EE) provides the same features as TCM SE; however, this platform expands TCM's useful functions outside of the Infinite Visions solution and into your agency's complete daily workflow. TCM EE gives you the ability to capture, deliver, manage and archive all of your documentation on a broader basis, integrate third-party systems and boost your return on investment.

**Tyler has two versions of Tyler Content Manager to maximize your agency's unique document storage needs:**

- TCM Standard Edition integrates with the Infinite Visions Enterprise Edition and the iVisions Employee Self Service and Online Workflow applications.
- TCM Enterprise Edition includes all of the features above and expands enterprise-wide to help you capture, deliver, manage and archive your documentation on a broad scale.

### Supported Image and Content Types:

- Text
- Rich Text Format
- Extensible Markup Language
- Comma-Separated Values
- Portable Document File® (PDF)
- XML Paper Specification
- Microsoft® Word Document
